

# Forest and Woodland

## Home Learning Challenges

In the woodland, there was a very busy squirrel. He had hidden 3 acorns in a tree trunk. He then finds 1 more acorn. How many acorns does he have altogether? You might like to draw a picture to help you find the answer.

Can you go for a walk with a grown-up to a woodland or an area with lots of trees? What can you see, hear, smell and touch? Can you use all of your senses to describe the things around you?

Can you find an interesting stick? What can you pretend your stick is? Maybe it could be a magic wand or a wriggly snake. Perhaps it could be a walking stick or a pirate's telescope. What does your stick look like? How many ideas can you come up with?

Owls and birds love to live in forests and woodlands but they also like to visit gardens, towns and cities. Can you make a bird feeder for all of the birds that may visit your garden or window? Simply thread hooped cereals onto a pipe cleaner or piece of string to create a delicious snack for your local birds.
